Become a troubleshooting master!

Love helping people solve technical, network, and cloud-based software problems? The A+ Certification Program focuses on the development of knowledge and skills in computer and security technologies. This program will prepare students for employment as desktop support and repair technicians. Hands-on skills include troubleshooting, and problem solving, of core IT services, such as operating system configuration, system component installation, networking, and cloud computing.

This program prepares students for the following certification(s):
- CompTIA A+
- CompTIA Network+
- CompTIA Security+
- Linux Essentials

MARICOPA COMMUNITY COLLEGES | *Phoenix College* **IT INSTITUTE**
